**(Place a check mark by the items you wish to have analyzed)**

___ Report Fee for mold/bacteria counts.	\$25.00 per kit
___ Microscopic Examination of Swabs.	\$6.00 per swab
___ Microscopic Examination of Air Conditioning Samples.	\$6.00
___ Culture and Identification of mold from Swabs and Samples.	\$60.00
___ Identification of Mold on Returned Plates from the BMT kit. (usually, one (1) plate is needed to identify the mold )	<u>\$60.00 each plate</u>

Total: \$ \_\_\_\_\_

**To take a swab sample:** Use dry cotton-tipped swab to collect dust from air conditioning register or heavy growths of mold on inside surfaces. *This is for identification only and has no quantitative value.*

**To take an air conditioning plenum sample:** This sample is taken from the area above or beyond the evaporator coil. *An air conditioning professional best collects this sample.*

**What does the BMT Kit contain?**

The BMT Kit contains the following items that may be useful while doing a home survey to determine if a microbial contamination is present in the home.

1. Two sets of 4 plates labeled A-15, A-30, B-15, and B-30 along with instructions to test two (2) sites within the home.
2. A zip-lock plastic bag containing a dry cotton-tipped swab to collect dust from the air conditioning register or a suspicious surface. (*Directions included.*)
3. An empty zip-lock plastic bag in which to place a sample from the plenum of the air conditioning system. (*An air conditioning professional best collects this sample.*)
4. Request form, if analysis or identification is desired.

**How do I return the BMT Kit plates and samples for analysis and mold identification?**

1. Fill out the request form found inside the BMT kit.
2. Repack the plate(s) that contain mold to be identified (usually only one plate), swabs, and samples in the BMT Kit box.
3. Return to Biogenics, Inc. by UPS Next Day Air.
4. Results will be faxed and a hard copy mailed within (3) three days after receiving the returned kit.

**What are the charges for analysis?**

1. Cost of analysis is listed on the enclosed request form.  
(*See Analysis Request Form – BMT Kit*)
